**PRECAUTIONARY STATEMENTS**

**HAZARDS TO HUMANS**

**DANGER**
Extremely hazardous in eyes and vapor under pressure. Liquid or vapor can cause serious skin or eye injury which may have a delayed onset. Do not get liquid on skin, in eyes or on clothing.

Do not breathe vapor. Inhalation may be fatal or cause unconsciousness after exposure to low or nervous system injury. Methyl bromide vapor is odorless and nonirritating to skin and eyes during exposure. It is toxic to levels which may occur without warning or detection by the user.

**NOTE TO PHYSICIAN**
Early symptoms of overexposure are dizziness, headache, nausea and vomiting, weakness and collapse. Long edema may develop in 2 to 48 hours after exposure. When exposed by cardiac irregularities; these effects are the usual cause of death. Repeated overexposures can result in blurred vision, staggering gate and mental imbalance, with probable recovery after a period of no exposure. Blood bromide levels suggest the occurrence, but not the degree, of exposure. Treatment is symptomatic.

**AIR CONCENTRATION LEVEL.**
The acceptable air concentration level for persons exposed to methyl bromide is 5 ppm (20 mg/m³). The air concentration is measured by a direct reading detection device, such as Matheson-Kitagawa, Draeger, or Sensidyne.

**REACTION AND REENTRY.**
After fumigation, treated areas must be aerated until the level of methyl bromide is 5 ppm or less. Do not allow entry into the treated area by any person before this time, unless protective clothing and a respiratory protection device (NIOSH/MSHA approved self-contained breathing apparatus (SCBA) or combination air-supplied/SCBA respirator) is worn.

**PERSONAL PROTECTIVE EQUIPMENT (PPE).**
Applicants and other handlers must wear:
- Loose-fitting or well ventilated long-sleeved shirt and long pants.
- Shirts and socks.
- Full-face shield or safety glasses with brow and temple shields (Do NOT wear goggles). When the acceptable air concentration level is above 5 ppm and a respirator is required, protect the eyes by wearing a full-face respirator.
- A respirator is required if the acceptable air concentration level of methyl bromide in the working area is measured to be 5 ppm or less. A respirator is required if the acceptable air concentration level of 5 ppm is exceeded at any time. The respirator must be one of the following types: (a) a supplied-air respirator (MSHA/NIOSH approval number prefix TC-19C) or (b) a self-contained breathing apparatus (SCBA) (MSHA/NIOSH approval number prefix TC-13F).

**ENVIRONMENTAL HAZARDS**
This product is toxic to fish and wildlife. Keep out of lakes, streams and ponds. Do not contaminate water by cleaning of equipment or disposal of wastes.

**SPILL AND LEAK PROCEDURES.**
Evacuate immediate area of spill or leak. Use a NIOSH/MSHA approved self-contained breathing apparatus (SCBA) or combination air-supplied/SCBA respirator for entry into spill area to correct problem. Allow spill to evaporate. Do not permit entry into spill area by persons without appropriate respiratory protection until concentration of methyl bromide is determined to be 5 ppm or less. Remove leaking containers to an isolated area and cover with polyethylene peeling of 4 mil or greater thickness. Seal by placing the outside edges of sheeting in a trench and cover with soil. Temp soil down so edges will not pull loose. Discharge the contents under the sheeting and do not disturb for at least 48 hours.

**CONTAMINATED SOIL, WATER, AND OTHER CLEANUP DEBRIS IS A TOXIC HAZARDOUS WASTE.** Report spill to the National Response Center (800-424-8802) if the reportable quantity of 1000 lbs. is exceeded.

**METH-O-GAS® Q COMMODITY FUMIGANT FOR QUARANTINE/REGULATORY USE ONLY SUPERVISION BY REGULATORY AGENT REQUIRED**

**ACTIVE INGREDIENTS:** Methyl bromide…………………………………………………100%

This product weighs 14.4 pounds per gallon.

**DANGER • PELIGRO • POISON KEEP OUT OF REACH OF CHILDREN**

Si Usted no entiende la etiqueta, busque a alguien para que le explique a Usted en detalle. (If you do not understand the label, find someone to explain it to you in detail).

**STATEMENT OF PRACTICAL TREATMENT.**
In all cases of overexposure, get medical attention immediately. Take person to a doctor or emergency treatment facility.

**IF INHALED:** Remove exposed person from contaminated area. Keep warm. Make sure person can breathe freely. If breathing has stopped, apply artificial respiration. Do not give anything by mouth to an unconscious person. If not unconscious, rinse mouth out with water.

**IF ON SKIN:** Immediately remove contaminated clothing, shoes, and any other item on skin. Wash contaminated skin area thoroughly with soap and water.

**IF IN EYES:** Hold eyelids open and flush with a steady, gentle stream of water for at least 15 minutes.

**SEE BACK PANEL FOR ADDITIONAL PRECAUTIONARY STATEMENTS**

**RESTRICTED USE PESTICIDE DUE TO ACUTE TOXICITY**
For retail sale to and use only by Certified Applicators or persons under their direct supervision, and only for those uses covered by the Certified Applicator’s certification.

**METH-O-GAS® Q**

**PRODUCT INFORMATION**

**COMBUSTIBILITY PROPERTIES:** Meth-O-Gas® Q is not flammable. It is a toxic hazardous waste.

**FLAMMABILITY PROPERTIES:** Meth-O-Gas® Q may be flammable. It is a toxic hazardous waste.

**ENERGY OF COMBUSTION:** Meth-O-Gas® Q is not explosive. It is a toxic hazardous waste.

**STABILITY:** Meth-O-Gas® Q is thermally stable. It is a toxic hazardous waste.

**SPONTANEOUS COMBUSTIBILITY:** Meth-O-Gas® Q is not spontaneously combustible. It is a toxic hazardous waste.

**DANGEROUS REACTIONS:** Meth-O-Gas® Q may cause severe corrosion of containers and equipment made of these metals.

**PHYSICAL AND CHEMICAL PROPERTIES**

**PHYSICAL PROPERTIES:** Meth-O-Gas® Q is a gaseous fumigant. It is a toxic hazardous waste.

**CHEMICAL PROPERTIES:** Meth-O-Gas® Q may be flammable. It is a toxic hazardous waste.

**PHYSICAL AND CHEMICAL HAZARDS**

**DANGEROUS INCOMPATIBILITIES:** Meth-O-Gas® Q may be incompatible with the following materials: any materials that cause severe corrosion or decomposition.

**DIRECTIONS FOR USE**

**STORAGE AND HANDLING OF CYLINDERS.**

**STORAGE:** Store in a secure manner either outdoors under ambient conditions or indoors in a well-ventilated area. Post as a pesticide storage area.

**HANDLING:** Do not contaminate water, food, or feed by storage. Store cylinders upright, secured to prevent tipping, and other devices to which the cylinder can be firmly secured. Do not remove valve protection bonnet and safety cap until immediately before use. Replace safety cap and valve protection bonnet when cylinder is not in use.

**TRANSPORTATION:** Transport cylinders using hand truck, fork truck or tongs or similar devices to unload cylinders. Do not transport cylinders using hand truck, fork truck or other device to which the cylinder can be firmly secured. Do not remove valve protection bonnet and safety cap until immediately before use. Replace safety cap and valve protection bonnet when cylinder is not in use.
When cylinder is empty, close valve, screw safety cap on to valve outlet, and replace protection bonnet before returning. Only the registrant, or his designee, is authorized to refill cylinders. Do not use cylinders for any other purpose.

**Disposal of Pesticide.** Pesticide wastes are toxic. Improper disposal of excess pesticide is a violation of Federal law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance.

**Disposal of Cylinders.** To insure proper return of empty or partial cylinders, make return shipping arrangements with the seller of the product.

METH-O-GAS® may be used for quarantine/regulatory commodity fumigation only. Supervision by regulatory agent is required. This fumigant is a highly hazardous material and should be used only by individuals trained in its proper use. You must carefully read and understand the accompanying use directions, GLK 398B, in order to use METH-O-GAS®. Observe all safety and precautionary statements as set forth in the accompanying use directions, GLK 398B. All fumigation directions, including dosage rates, exposure times and aeration periods are given in the accompanying use directions, GLK 398B.

**STATEMENT OF WARRANTY AND LIABILITY**

Seller warrants that this product complies with the specifications expressed in this label and GLK 398B. SELLER MAKES NO OTHER WARRANTIES; AND DISCLAIMS ALL OTHER WARRANTIES, EXPRESS OR IMPLIED, INCLUDING BUT NOT LIMITED TO WARRANTIES OF MERCHANTABILITY AND FITNESS FOR THE INTENDED PURPOSE. Seller's liability for default, breach, or failure under this label shall be limited to the amount of the purchase price. Seller shall have no liability for consequential damages.

Many pesticidal chemicals are poisonous and may leave a toxic residue on the plants to which they are applied. The U.S. Environmental Protection Agency has established maximum amounts of such pesticidal chemicals that may remain on raw agricultural products, and it is the user's responsibility to see that there is no residue on such crops in excess of these amounts. The "Directions for Use" are based on the best available information, and if followed carefully should not leave excessive residues. However, Great Lakes Chemical Corporation assumes no responsibility as to their accuracy nor for any loss due to excessive residues.
